BOOST YOUR DEPLOYMENT SUCCESS WITH OUR EXPERT SERVICES

Microlab
A Division of RF Industries

DISCOVER NEW WAYS TO ENHANCE RF PERFORMANCE AND CUT COSTS

Choose from three levels of complimentary design audit and consultation services to bring the right expertise to any DAS project.

1 **Basic Design Audit**
Reveal critical design issues and basic bill of materials (BOM) improvements that will help you cut costs in ways that don't impact key performance indicators (KPIs) or propagation results.

2 **Enhanced Design Audit**
Learn which design improvements to RF combining and RF distribution networks will best help you reduce transmission losses and lower costs.

3 **Integrated RF Services**
Get a complete package of network products that will help you enhance network performance and reduce overall capital and operational costs for the project.

Contact us to learn more about our expert services or to schedule a consultation. **All three service levels are free of charge. Why wait?** Start now and unlock your potential savings today.

SUPPORT FOR ALL MAJOR DAS DESIGN AND MODELING TOOLS

Using iBwave for DAS design? No problem. Using Ranplan or Atoll instead? No problem. Our RF design library includes the iBwave, Ranplan Wireless and Atoll In-Building files for all Microlab solutions.

ATOLL   **iBwave**   **Ranplan WIRELESS**

> " Microlab's customer service is very personalized and is one of, if not the best, I've experienced in the Wireless industry. "

WHY PARTNER WITH MICROLAB FOR DAS PROJECTS

WE BRING YOU AN UNMATCHED COMBINATION OF KNOWLEDGE, SUPPORT AND SOLUTIONS

PROVEN EXPERTISE
We have a long and strong history of optimizing DAS designs in venues and tunnels as well as large and mid-sized buildings.

BROAD REACH
Our nationwide network of distribution partners and sales channels makes it easy to get the reliable, high-quality solutions you need.

SIMPLICITY
We are your single source for all the products required to streamline and accelerate even the most challenging DAS projects.
