Microlab DxW-GPS-43FN Wilkinson style splitters have been designed for GNSS applications. All ports pass DC to the antenna LNA. The unit has a frequency coverage from 1100 to 1650 MHz, and offers high output isolation and good VSWR. Wide frequency of operation allow for use with GPS L1/L2/ L5, Galileo E1/E5/E6 and Glonass G1/G2/G3 bands.
