The YA-31NF is an attractive low cost MIMO omnidirectional antenna. These antennas are popular for propagating in-building wireless signals in distributed antenna systems, (DAS). This wideband antenna covers all common wireless and WiFi bands in the range of 698 to 6000 MHz such as 700, 800, 850, 900, 1700, 1800, 1900, 2100, 2400, 2600, 3500, 4900, 5000 and 5750 MHz.

The Antenna only requires two mounting holes for installation via the fitted Low PIM N-type female connectors but offers additional screw fixing holes disguised beneath press-fit caps. The antenna is ground independent and can be fitted onto both thick and thin ceiling tiles. (6/15)
